The park is spread over an area of 1,171 km² that lies between an altitude of 1500 to 6000m. The Great Himalayan National Park is a habitat to more than 375 [fauna](#) species that comprises nearly around 31 mammals, 181 birds, 3 reptiles, 9 amphibians, 11 annelids, 17 mollusks and 127 insects. They are protected under strict guidelines of [Wildlife Protection Act of 1972](#), hence any sort of hunting is not permitted. It also supports the variety of plant life, scattered over the park.

Food in India is wide ranging in variety, taste and flavour, and is generally characterised by its somewhat extensive use of spices and herbs. However, Indian cuisines do vary, reflecting the assorted demographics of an ethnically diverse country. Being so diverse geographically, each region has its own cuisine and style of preparation. The unique and strong flavours in Indian cuisine are derived from spices, seasonings and nutritious ingredients such as leafy vegetables, grains, fruits, and legumes. Traditionally, a well-balanced Indian meal contains six tastes – sweet, sour, salty, spicy, bitter and astringent. This theory can explain the use of numerous spice combinations and depth of flavour in Indian recipes.
- ❖ In the evening, we drive to “The Kingdom of Dreams”. Kingdom of dream is India’s first live entertainment and leisure destination point which is located at the apex of the golden triangle of Jaipur, Agra and Delhi.
